

The background of the slide is a dark blue gradient. It is populated with numerous 3D-rendered gold coins of various sizes. The coins are in motion, appearing to fall from the top of the frame towards the bottom. They are shown from different angles, some face-up, some face-down, and some in profile, creating a sense of dynamic movement. The lighting on the coins gives them a metallic sheen and highlights their circular form and the rectangular slot in the center of each.
